

STREAMLINING DEF SUPPLY: THE BLUE NETWORK APPROACH

LEARN ABOUT HOW WE'VE OPTIMIZED DIESEL EXHAUST
FLUID (DEF) SUPPLY AND OFFER HIGH QUALITY PRODUCT
AND SERVICES TO OUR NETWORK MEMBERS.

WHAT IS DEF?

Diesel engines are great for power and fuel efficiency, but they have one significant downside: they can produce harmful emissions, including nitrogen oxides (NOx) which are bad for both our health and the environment.

That's where Diesel Exhaust Fluid (DEF) comes in. DEF is a solution made of water and urea, that is added and stored on the vehicle separate from diesel fuel. DEF gets injected into the exhaust system of the diesel engine while the engine is running, reducing through selective catalytic reduction (SCR) the nitrogen oxide emissions of your engine.

AS EXPERTS IN DEF, BLUE NETWORK OFFERS YOU A HIGH-QUALITY DEF PRODUCT AND COMPLETE DISTRIBUTION SOLUTION THAT IS ISO 22241 CERTIFIED TO HELP YOU RUN CLEANER. FURTHER INFORMATION ON THIS CERTIFICATION CAN BE FOUND IN OUR WHITEPAPER "THE RELIABLE SUPPLY OF QUALITY DEF PRODUCT SOLUTIONS".

BLUE NETWORK: OUR SMART APPROACH TO DEF

We provide a comprehensive solution inclusive of sales, distribution, and safe delivery of DEF liquid, equipment, and support with reliable and knowledgeable experts to give you peace of mind. With Blue Network, you'll gain the advantage of all-in or customized service and a one-stop-shop that can include system design, installation, delivery, maintenance, and financing performed by a nationwide network of partners.

DIG INTO THE DETAILS

MAIN POINT OF CONTACT

We'll serve as your main point of contact for any DEF-related support you may need. Our experienced team will take care of any inquiries, service, and repair requests with a single call and fast, simple support.

EASY, CONVENIENT DELIVERY

Enjoy easy, automatic refill scheduling and keep your tanks stocked with high-quality DEF from Blue Network.

INTELLIGENT TANK DESIGN

We create a solution that works for you – whether it includes fixed or portable equipment and indoor or outdoor setup, we provide options that grow with your needs and business.

FOCUSED ON COMPLETE SOLUTIONS

We'll help you keep your trucks on the road with a complete DEF solution, nationwide network of partners, and support led by industry experts. And with a range of options based on your needs, we combine total value with true convenience.

EXPERT ADVICE AT YOUR FINGERTIPS

We take pride in ensuring that our customers have access to innovations in the industry. We specialize in DEF handling, delivery, equipment, and supply systems, tailored to meet our customers' specific site needs. Enjoy reading about "The Reliable Supply of Quality DEF Product Solutions", "Overcoming common DEF Challenges", and more!

PLAN WISELY WITH YOUR NETWORK

Regardless of how complex your operations are, our design and planning experts at Blue Network will create a custom, cost-effective solution based on your historical and projected needs.

1. TANK SIZE

Blue Network's tank sizes range from small 1,893 L (500 USG) movable indoor tanks to large 56,781 L (15,000 USG) outdoor heated tanks with Cardlock integration. Determining the right tank size for your operation is a key element of service planning.

2. FLEET MIX

We'll look at the size of your fleet, the service planning required, and both the number of current SCR equipped vehicles in your current fleet and your projected number of future SCR equipped vehicles.

3. RANGE

Operation range of your equipment is an indicator of consumption. We'll analyze the mileage and hours of operation – including both the current and projected range – to create an optimized solution based upon the demand capacity of your business.

4. EQUIPMENT NEEDS

We look at all of the variables needed to plan accurately, including indoor and outdoor locations, equipment capacity, consumption, inventory monitoring, and any site access considerations such as security, hours of operation, and more.

OUR EXPERTS AT BLUE NETWORK WILL TAKE THE
UNIQUE FACTORS OF YOUR OPERATIONS AND CREATE
A SOLUTION TO HELP YOU MAXIMIZE EFFICIENCY.

CUSTOMIZABLE EQUIPMENT CONFIGURATIONS

Blue Network solution options are customizable and flexible.

Take a look at some of our equipment options below:

1. VERTICAL

- 2,200 to 9,000-litre capacity
- 2" fill line
- Emco Wheaton 4-prong dry break adaptor
- Internal downtube with foot valve
- 1" shut off ball valve
- ¾" hose barb
- 325 PIUSI or Hornet W85 DEF pump
- Auto shut-off DEF nozzle with 20' EPDM hose

2. HORIZONTAL

- 2,200 to 15,000-litre capacity
- Same equipment as vertical but with a different format

3. OUTDOOR

- 4,100 to 11,000-litre heated tank
- 2" top load filter line
- Stainless steel cabinet 4'x3' with W85 DEF pump
- 20' EPDM ¾" DEF hose
- Inline turbine meter
- Auto shut-off DEF nozzle
- 750 W heater
- Level monitor
- Bottom feed line with 1" bung and 1" shut-off valve

4. CARDKEY

- 12,000-litre heated outdoor tank
- 2" top load fill line
- Stainless steel cabinet 4'x3'
- ½ hp SS submersible DEF pump
- Downtube with foot valve and 1" shut off ball valve
- Inline turbine pulse meter for Cardlock integration
- Tank level monitor with heat wrapping for cold climates
- Dispenser RDR, GasBoy, Wayne for W&M commercial installations
- Computrol, PetroVend, Veeder Root or other

5. TOTE

- Smallest portable bulk storage option
- Minimal upfront cost
- 1,041 litre or 1,250-litre options
- Can be connected together to increase capacity
- Interchangeable parts for ease of maintenance

ABOUT BLUE NETWORK

We are your one-stop-shop for the sale, distribution, and delivery of DEF, equipment, and support.

In addition to supplying high quality DEF, Blue Network and our national network of partners provide design, installation, maintenance, financing, equipment, and full system support.
